Pay

A powerful payment solution designed for WooCommerce merchants

PayXpert provides a powerful and flexible payment solution designed to improve checkout performance and simplify payment management for WooCommerce merchants.

The module allows merchants to easily manage payments from a single interface, including across multiple stores.

A robust and scalable payment infrastructure

It integrates directly with the PayXpert platform, giving merchants access to a robust and scalable payment infrastructure with omnichannel capabilities.

Merchants can offer multiple payment methods including cards, Apple Pay, Google Pay, pay-in-installments options, pay-by-link, and recurring payments, adapting to a wide range of customer preferences.

Get started quickly with a plug-and-play setup

Designed for simplicity and accessibility, the module offers a plug-and-play setup with minimal technical requirements, allowing merchants to get started quickly while maintaining full control over their payment flows.

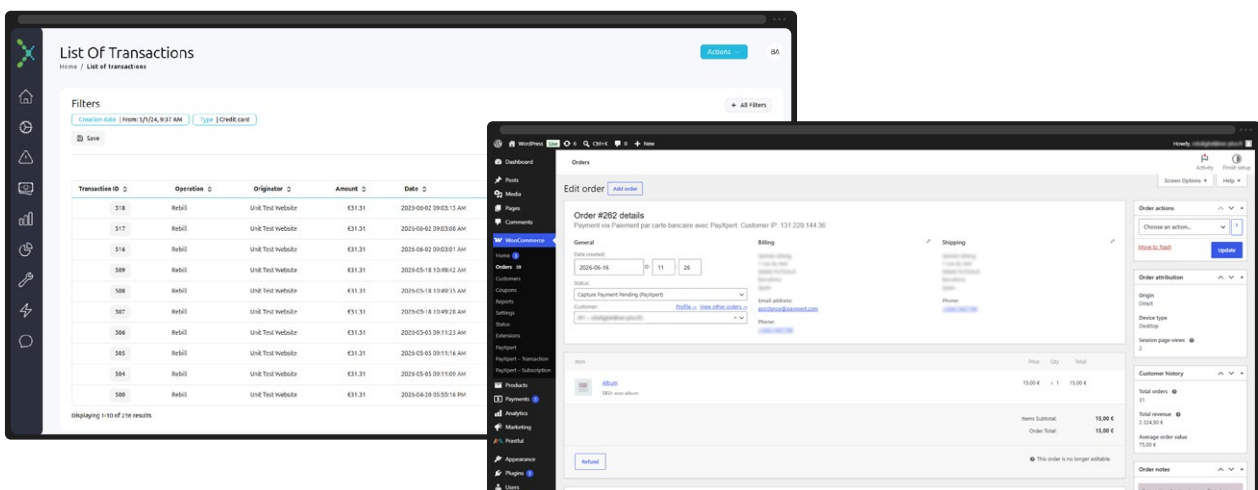

Tailor your checkout experience

With flexible checkout modes (redirect or embedded iframe), merchants can tailor the payment experience to their needs while reducing friction and

Core features

PayXpert includes a comprehensive set of features designed to provide flexibility, security, and ease of use for merchants:

- **Accept card payments:** Process credit and debit cards (Visa, Mastercard, CB, American Express)
- **Support most popular wallets:** Enable Apple Pay and Google Pay for easy and fast checkout
- **Manage multi-store:** Operate across multiple shops with full WooCommerce multi-store compatibility
- **Offer installments:** Provide pay-in-installments (split payments) with configurable conditions
- **Handle subscriptions:** Enable recurring payments and subscription-based business models
- **Send payment links:** request payment via email or other channels with pay-by-link functionality
- **Control transactions:** Oversee the full payment lifecycle (authorisation, capture, refund) of users
- **Manage your products seamlessly:** Create products and set pricing directly in WooCommerce, with automatic processing and synchronisation through the PayXpert module
- **Configure checkout:** Choose between redirect and embedded iframe payment flows
- **Display dynamically:** Show available payment methods based on account configuration
- **Secure transactions:** Apply strong customer authentication with 3D Secure
- **Automate synchronisation:** Sync transactions and subscriptions automatically
- **Handle currencies:** Accept multiple currencies with settlement in your account currency
- **Enable seamless checkout:** Provide a smooth and integrated checkout experience
- **Enhance accessibility:** Provide accessible payment page options to support a wider range of users

Why merchants choose PayXpert

Increase conversion with optimised checkout flows

Expand internationally with multi-currency support

Reduce friction with flexible checkout options

Boost revenue with subscriptions and installment payments

Simplify payment operations from a single interface

Get started in minutes

Getting started with PayXpert is quick and straightforward:

1. Log in to your WordPress backend
2. Uninstall any versions prior to 2.0, if applicable
3. Go to **Plugins > Add Plugin**
4. Click **“Upload Extension”**
5. Upload the **payxpert.zip** file
6. Click **“Install Now”**
7. Configure your API keys and payment settings

Important

In the plugin configuration:

Public API Key = Originator ID

Private API Key = API Key provided by PayXpert

8. You're ready to accept payments with PayXpert

PayXpert account requirements

This module requires an active PayXpert account.

To start accepting payments, merchants must:

- Subscribe to PayXpert services
- Obtain API credentials provided by PayXpert after contract activation:
 - **Public API Key:** the Originator ID
 - **Private API Key:** the API key provided for this Originator
- Configure the PayXpert module with the payment settings you desire in the WooCommerce Back Office

Technical requirements

- **PHP version 7.4** or higher
- **WordPress version 6.0** or higher (tested up to 7.0)
- **WooCommerce version 7.6.0** or higher (tested up to 10.6.1)

Support and technical documentation

About PayXpert

PayXpert is a pioneer in omnichannel payments.

We support local and international brands across various industries, providing services both online and in-store. Our vision is to create a payment ecosystem that facilitates an inclusive commerce experience.

We have developed services focused on revenue optimisation, performance enhancement, fraud prevention, as well as cross-border payments such as Discover or JCB, and alternative methods like Alipay+ and WeChat Pay.

Our solutions also integrate inclusive features for the visually impaired.
